WELDING TECHNOLOGY (SMAW, MIG-TIG)

Program Objective

The Welding Technology-Advanced Program trains students for careers as specialty welders in various sectors of the welding industry. It focuses on developing intermediate and advanced skills in Shielded Metal Arc Welding (SMAW) and Gas Tungsten Arc Welding (GTAW), as well as pipe fitting techniques. The course is tailored for both new and current welders, emphasizing efficient setup and fabrication of fixtures to enhance productivity and reduce costs. It also includes training in advanced welding procedures, robotic welding, and principles of Computer Numerical Controlled (CNC) Plasma Cutting, covering setup, basic programming, and troubleshooting.

Program Content

The Welding Technology program course prepares students for entry into the welding industry. Students explore career opportunities and requirements of a professional welder. Content emphasizes beginning skills key to the success of working in the welding industry. Students study workplace safety and organization, basic manufacturing processes, metals identification, basic interpretation of welding symbols, and oxyfuel gas cutting practices.
